

IronFrame Field Notes · Free checklist draft

AI Agent Approval Gate Checklist

If the action sends, spends, publishes, deletes, exposes secrets, changes access, or touches real-money markets, the agent stops and asks.

Green · local prep

- Draft content/templates locally.
- Summarise public sources.
- Edit Git-tracked files.
- Run tests/dry-runs.
- Prepare approval packets.

Amber · approval

- Publish/upload/send.
- Spend money or credits.
- Create accounts.
- Use private details.
- Deploy/connect systems.

Red · default no

- Handle secrets.
- Hide affiliate links.
- Guarantee income.
- Trade or bet.
- Spam or scrape private data.

Evidence before completion

- Files changed and sources used.
- Commands/checks run.
- External systems touched: yes/no.
- Approval gates triggered.
- Next safe action.

Approval sentence

Approved to [specific action] using [platform/tool], with [identity/details], spending up to [limit], and stopping before [boundary].

Local draft. Not legal, financial, security, or investment advice. Publishing/product use requires Mark approval.
